

Datasheet

BECOM_LWL_Aufroller_52

Description

Fiber cable management panel with compartments for winding excess length of fiber optic cables.

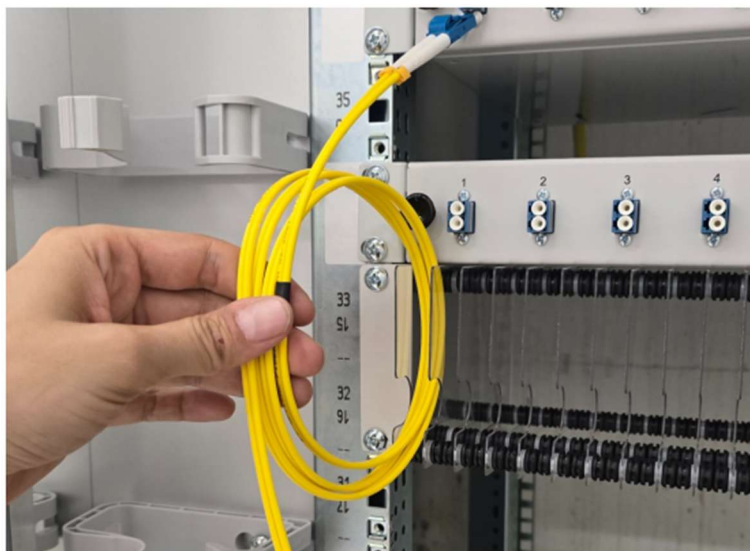

Technical data

- **Dimensions : 483 x 90 x 150 mm**
- **Number of compartments : 52**
- **Weight: 1,1 kg**
- **Material: Aluminum bracket**

Instructions for use

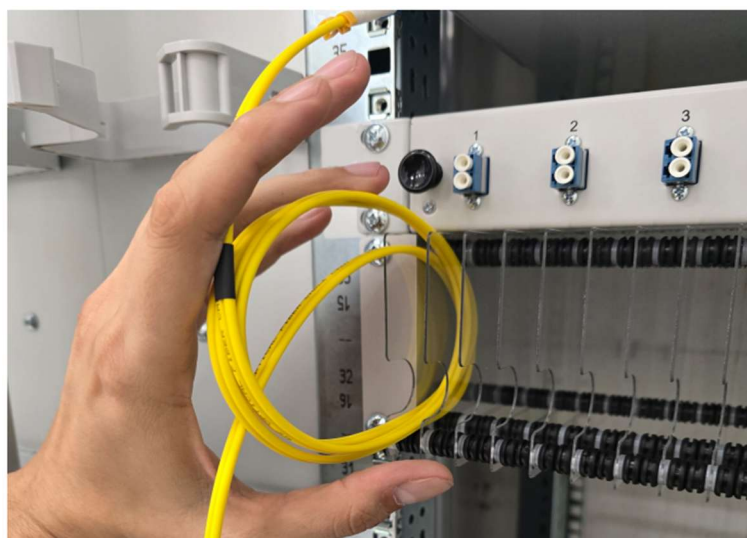

Step 1

The excess length must be rolled up neatly before being inserted into the compartment.

Step 2

The coiled fiber is then lightly compressed with the fingers to give them an oval shape, to make it easier to store the excess length in the compartment.

Step 3

The fiber is gently pushed into the compartment until the desired position is reached.
